

# Quick Install Guide – AC/DC Adaptor

AC/DC Adaptor for FTP-3XX

## 1 Use cases

The **AC/DC Adaptor** is a useful accessory to your FTP-3XX when not using Solar Panels for powering the unit.

It can be installed permanently to power your FTP-3XX where you have grid power available. When you need a power source and backup for high priority devices requiring maximum uptime, like a UPS.

It can also be used to power the FTP-300 during indoor testing or where solar panels are not easily accessible, simulating power delivery from solar.

## 2 Specification

**Input Voltage:** 90-265VAC

**Output Voltage:** 24VDC

**Output Power:** 90W

**Input terminal:** Choice when ordering, US (B), EU (C) or UK (G)

**Output terminal:** Male/Female MC4 connectors

**Rating:** IP67 outdoor

## 3 Installation

The AC/DC adaptor can either be used as a loose desktop device or installed permanently on a wall using 2 screws size #8-10 (4-5 mm) and appropriate wall plugs.

Make sure the FTP-3XX is on with all fuses installed. Connect the MC4 connectors to the FTP-3XX first before switching on the AC/DC adaptor at the wall socket.
